

# *Landscape* Networks

®

*Data Networks  
& Telecommunications*

## The company

Landscape specializes in providing integrated IT and Networking Solutions for data centers, corporate buildings, Hospitality and special installation cases as factories, storage sites, etc

**In particular, Landscape's activities covers the areas of designing and implementing integrated solutions including:**

**Structure cabling, integrated network infrastructure, electrical networks, active equipment backbone for computer networks, office building automations and security systems in data centers, buildings and industrial places.**

**Backbone fiber networks OM3 10G, OM4 40G for data and telecommunications in groups of buildings, industrial places, metropolitan areas and wide areas.**

Landscape is a certified installer for designing and constructing networks by PANDUIT, PRYSMIAN (former PIRELLI), Brand Rex and Cisco.

We are authorized to provide warranty contracts form the above Vendors concerning the installation that we provide.

Our specialization and our experience combining with the qualifications of our stuff and a wide range of customers Warranties the construction of trusted and technologically advanced solutions.

*Certified Installer*

## Objectives

Landscape has put in place and full operation a full- fledged presales department and specialized technical department supporting the following:

### **Design and realization of structure cabling systems able to support the transportation of Data/Voice/Video/ control signals for Building management systems( air conditioning, fire detection, access control, CCTV).**

During both the design and implementation fazes there is full conformance to all relevant international and European Standards and applicable regulations such as EIA/TIA 568 B.1,B.2,B.3, ISO/IEC 11801-2000, EIA/TIA 568 B.2-1 Cat6, Cat 6A EN 50174, EN 50173, TSB 67 Level III, EIA/TIA 606, EIA/TIA 604 FOCIS 6, EIA/TIA 455, IEC 60603-7-7.

During the installation process, all systems are fully tested by using state of the art equipment i.e. (OTDR), (TDR). Upon completion all systems should pass specific tests to ensure the premium performance over the specified class or performance category.

Our company has all the appropriate equipment to perform fiber backbone cabling concerning groups of buildings, metropolitan area networks, wide area networks. All cabling components used meet or exceed the Cat 6 or Cat 6A performance levels respectively 6 or 6A.

Our company has established strategic partnerships with world- Class Vendors like (PANDUIT, PRYSMIAN, Brand Rex, TELDOR Belden etc.).

Our company is certified installer by the PANDUIT, PRYSMIAN and Brand Rex Vendors and authorized to support their warranty and quality assurance programs.

Upon completion all installed systems get fully documented and customer receives the following standard deliverables: Analytical test reports, application desings in electronic format (Visio format, autocad format), and a 25 years warranty contract. You may find attached samples of warranty contracts.

### **Design and realization backbone active equipment serving the computer network**

Our company provides and implements Networking and IP telephony products from world-class vendors such us (CISCO, ALLIED TELESYN).

### **Design and realization of a control and management center (Data center/Equipment room).**

Our company is specialized in installation of Data centers in office buildings. We are able to implement all systems that consists a fully operational and fully trusted equipment room. During both the design and implementation fazes there is full conformance to all relevant international and European Standards and applicable regulations.

### **Design and realization of integrated Solutions for Hospitality Environments**

The Company specializes in providing Integrated solutions for the hospitality sector, utilizing the "Everything over IP Solution" Including IPTV, VoD, IP PBX etc

### **Design and realization of office automation systems for air conditioning. fire protection, access control, CCTV.**

During both the design and implementation fazes there is full conformance to all relevant international and European Standards and applicable regulations.

### **Design and realization of electrical network and lighting.**

## Activities

Our company has already implemented many important projects. Some of those are listed below:

Realization of integrated solution, (Copper CAT 6, Fiber optics OM3 10G links), servicing the data network, concerning the Data Center of Infoquest.

Design and realization of integrated solution, (Prysmian blown fibers OM3 10G links, Panduit Copper CAT 6A 10G links), servicing the new Data Center and the buildings of National Television.

Realization of integrated solution (Copper CAT 6 10G links, Fiber Optics OM3 10G links, managed network panels), servicing the data/voice network, concerning the Data Center and the building of Athens Stock Exchange.

Realization of high-speed data terminating devices (Copper CAT 6A 10G links, Fiber Optics OM3 10G links), servicing the data network, concerning the Data Center of OTE.

Installation and provision of optical broadband network at public areas for Tellas fiber optic backbone network deployment.

Installation and provision of broadband network at public areas for Netone backbone network deployment.

Design and realization of integrated solution servicing the data/voice network concerning the group of buildings of the Supreme Administrative Court in Athens.

Design and realization of integrated solution servicing the data/voice network concerning the new buildings of Tellas in Athens and Larisa.

Design and realization of an integrated solution serving the group of five buildings of Sivitanidios public school in Athens. The solution set includes structure cabling and backbone L3 active equipment.

Design and realization of an integrated solution serving the building of Cetelem bank in Piraeus. The solution set includes the structure cabling, the electrical network, the data center, (Central UPS unit, electrical power generator), and backbone L3 active equipment.

Design and realization of an integrated Solution Serving the two buildings of A.E.Π.Ι. in Marousi. The solution set includes the structure cabling, the electrical network, the data center (Central UPS unit, electrical power generator), and Cisco networking backbone, Cisco IP telephony implementation.

Design and realization of structure cabling servicing the data/voice network concerning buildings of the Ministry of Justice, Ministry of Health and Ministry of Economics in Athens.

Design and realization of fiber backbone serving the installations of Public Company of Water Supply in Galatsi, Menidi, Kiourka in Attiki.

Design and realization of structure cabling serving the data/voice network in the the central building of National Bank of Greece in Athens.

Design and realization of an integrated solution serving the Deree College in Athens. The solution set includes structure cabling and backbone L2 active equipment.

Design and realization of integrated solution servicing the data/voice network concerning the installations of Renault in Athens.

Design and realization of an integrated solution serving the building of Profile Group in Athens. The solution set includes the structure cabling, the electrical network, the data center, (Central UPS unit, electrical power generator), and backbone L3 active equipment.

Design and realization of an integrated solution serving the building of IPS in Athens. The solution set includes the structure cabling, the electrical network, the data center, (Central UPS unit, electrical power generator), and security systems.

Installation and provision of data and telephony networks at the branch offices of Morgan Stanley in Athens.

Design and realization of an integrated Solution Serving the building of SMA in Athens. The solution set includes the structure cabling, the electrical network, the data center infrastructure.

We hope that the above activities lye within the spectrum of your interests we are looking forward to collaborating with you in order to meet the upcoming business challenges in the most creative fashion.
